Birmingham, West Midlands

M: 07539655662 E: najib98@protonmail.ch L: [linkedin/najibibrahim](https://www.linkedin.com/in/najibibrahim)

PERSONAL PROFILE:

An enthusiastic Cybersecurity Masters student and Computer Science (with Honours) graduate who possesses a range of fundamental ICT and interpersonal skills. Graduated with a Merit and First-Class honour, seeking opportunities to develop industry experience and build a wider skillset.

Experienced with a range of programming languages. Familiarised with a wide range of practices, i.e. agile, and programming languages across the spectrum of paradigms, ranging from more the conventional Objected Oriented to the more unorthodox Functional (F#) programming paradigms.

As a computer science graduate, I am eager to join a fast-moving company that will allow me to reach my full potential as a technical expert in cutting edge full-stack web & mobile technologies. With a passion for problem-solving and an eagerness to progress quickly, I am ready to take on real responsibility as a technical leader and coach within the next few years. My experience with Python and JavaScript, as well as my desire to learn new technologies, makes me a perfect fit for your company.

In addition to my studies, I have demonstrated my interest in technology through various projects and hackathons. I bring intensity to work, valuing ownership, autonomy, fresh thinking and creativity, and am committed to continual self-development. I am not afraid to speak up and encourage dissenting voices, always leaving ego behind. I am confident that my skills and passion make me a strong candidate for your company and I am eager to contribute to its success.

IT SKILLS:

- Programming – Python, Java, F#, JavaScript, etc.
 - HTML – HTML5, CSS.
 - Database – AWS, MySQL, MongoDB, MongoDB Atlas.
 - Web and Mobile – Demonstrated an aptitude in developing web mobile application using external APIs and various frameworks as well as developing SCRUM and REST full stack application.
 - Data Analysis – Strong proficiency in Excel.
 - Other – Node.js, Linux, API implementation
-

EDUCATION:

Birmingham City University **Sep 2020 –March 2022**
Masters, Cybersecurity, Merit

Birmingham City University **Sep 2016 – Jul 2019**
BS (Hons.) Computer Science, 1st

Key Modules include:

Data Analysis: 94.2 %	Advanced Programming: 90 %	Hardware and Software Systems: 81%
Network Management: 79.5 %	Foundation of Database Systems: 80 %	AI and Machine Learning: 85%

Joseph Chamberlain College Computing: Distinction*, French: C, Mathematics: D
Date: Sept 2014- July 2016

Aston Manor Academy GCSEs: 11 A-C grades incl. Mathematics (B) & English (C)
Date: Sept 2010 – July 2014

EMPLOYMENT HISTORY:

Position: Service Desk Analyst

Employer: Birmingham City Council

Date: Current

- Provide technical support to customers and employees. Handle technology duties such as software installation, troubleshooting and maintaining computer health. Respond to phone calls, emails, live chats and other communications.

PROJECTS:

Current:

- A professional portfolio website developed using React.js

Past:

- Full-stack RESTFUL React Native application which allows the user to Add, Remove, Update and Delete entries residing in a MongoDB Atlas database.
- A web browser extension that provides an extra layer of insurance by notifying the user to information not explicitly shown by the website regarding being cognisant of their digital footprint.
- An AI machine learning algorithm that efficiently and intelligently sorted through a large data set store on an Excel spreadsheet.

ADDITIONAL SKILLS:

- Fluent in three languages French, English, and Somali.

INTERESTS:

Enjoys solving critical thinking tasks that require lateral thinking and strategy; takes pleasure in playing chess whenever the opportunity presents itself. Participates in sports such as football and other group activities which helps develop a team-oriented mind-set and enables to be pushed to partake in larger projects which aim at attaining a common goal. I am currently undertaking a course to further develop my web development skills.

Driven and confident in firm commitment to excellent performance and professional growth will make him a strong contributor to your team he looks forward to meeting with you to discuss how his skills and attributes can best compliment your company.
